DETAILED ACTION

Claim Objections

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

There are two claims numbered 155. Second misnumbered claim 155 has been renumbered 156 and all claims following it have been renumbered in accordance. Thus last claim is numbered 169 rather than 168.

Election/Restrictions

1. The applicant in reply to office action sent 05/29/2008 added new claims 113-169, which if had been presented originally an election of species would have been made.

This application contains claims directed to the following patentably distinct species:

Election 1: 115-117, 142-144, three different quantitative evaluation component achieved by three different means. Choose one.

Election 2: 119, 147 or 120, 148 two different options for a selected population.

Election 3: 122, 150 or 123, 151 or 124, 152 different species of data source.

Election 4: 125, 153 or 127, 155 two different species of ranking.

Election 5: 128-129, 156, 157 or 130-131, 158, 159

Election 6: 139 or 135. Different ways to determine minimum entry score. If claim 135, 163 is elected, Applicant must further elect between 136, 164 or 137, 165.

The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 113-114, 118, 121, 132, 140-141, 146, 149, 160, 168 and 169 generic.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are

added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.
